

Abstract of the Disclosure

A fire fighting foam concentrate containing a foamable fire fighting agent, a water-soluble dye, and glycol ether. A fire fighting foam concentrate containing a fluorosurfactant-based fire fighting agent and a water-soluble dye. The concentrates are usually diluted with up to 100 times (v/v) water and aerated into a foam. In addition, a method for evaluating fire fighting foam concentrate concentrations in the fire fighting foam compositions created when the concentrates are diluted.
